CASE STUDY SPOTLIGHT

INDUSTRIAL CONSIGNMENT SERVICES FOR VALVE & PARTS DISTRIBUTOR

Our client is an industrial equipment and parts distributor servicing the Midwestern United States. Their inventory primarily consists of valves and automation components for a wide range of industrial businesses. After restructuring their operations, much of our client's assets became surplus or idle to their needs.

Our client was inundated with a large quantity of surplus and idle assets. They sought an asset management solution that could provide the resources required to sell, transport and store these assets, while providing the maximum return on assets.

Overview

We offered our clients a multi-faceted asset recovery solution that focused on maximizing their return on assets and providing a streamlined process for managing and storing their surplus equipment.
