MESSAGE FROM OUR BDM.

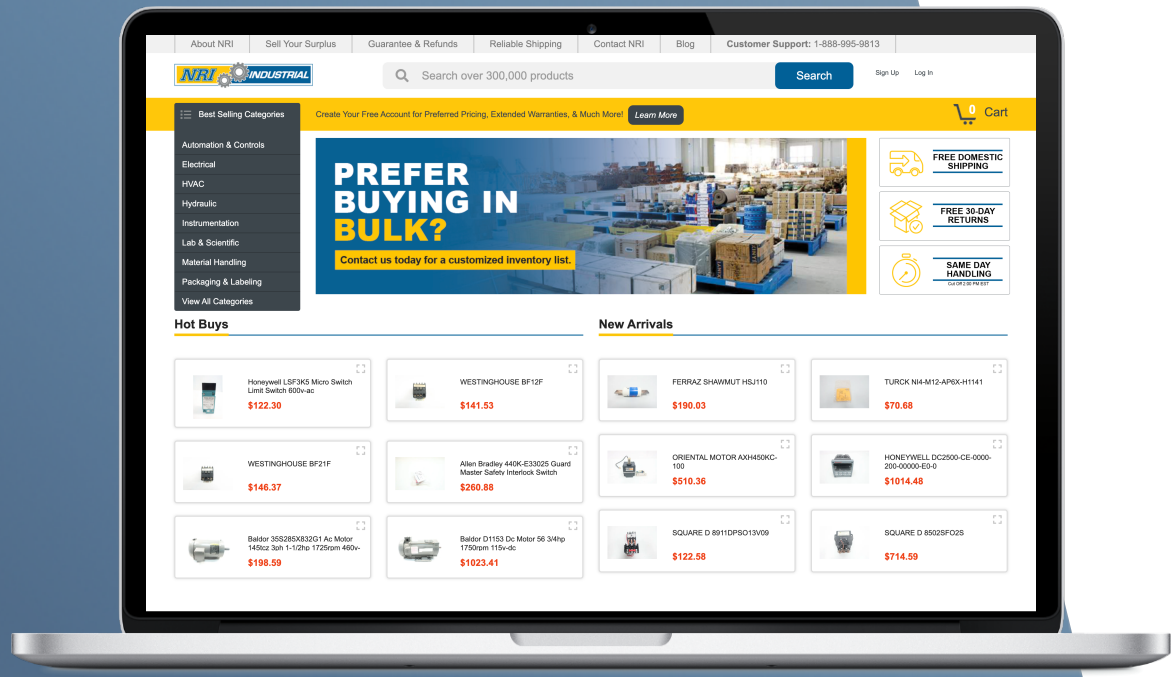
“Redeploying assets across facilities within your organization is another way too quickly improve spare parts management within your organization. For this strategy of asset management to be effective, you need to ensure that your inventory is shared across all facilities allowing each location to access and see precisely what assets each facility has.”

MICHELE LESTER

Our Mission

A WORLD WITHOUT INDUSTRIAL SURPLUS.

“We assist our clients find and recover value in challenging situations.”



NRI INDUSTRIAL MARKETPLACE SUCCESS

Tight supply conditions and strong end-user demand continue to drive increasing used equipment values in both the retail and auction markets.

CASE STUDY SPOTLIGHT

INDUSTRIAL CONSIGNMENT SERVICES FOR VALVE & PARTS DISTRIBUTOR

Our client is an industrial equipment and parts distributor servicing the Midwestern United States. Their inventory primarily consists of valves and automation components for a wide range of industrial businesses. After restructuring their operations, much of our client's assets became surplus or idle to their needs.

Our client was inundated with a large quantity of surplus and idle assets. They sought an asset management solution that could provide the resources required to sell, transport and store these assets, while providing the maximum return on assets.

Overview

We offered our clients a multi-faceted asset recovery solution that focused on maximizing their return on assets and providing a streamlined process for managing and storing their surplus equipment.
